

# Largest Rectangle in Histogram

Try to solve the Largest Rectangle in Histogram problem.

We'll cover the following ^

- Statement
- Examples
- Understand the problem
- Try it yourself

## Statement

Given an array of integers, `heights`, which represents the histogram's bar height, find the area of the largest rectangle in the histogram, where the width of each bar is constant (such as, 1).

### Constraints

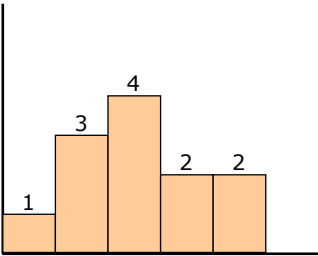

- $1 \leq \text{heights.length} \leq 10^5$
- $0 \leq \text{heights}[i] \leq 10^4$

## Examples

### Sample example 1

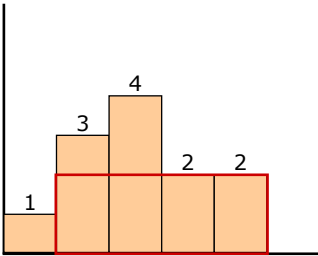

**Input**

heights	1	3	4	2	2
---------	---	---	---	---	---

**Explanation**

**Output**

8
---

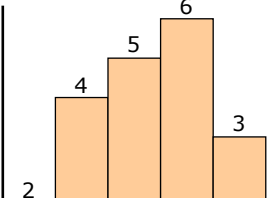

**Explanation**

1 of 2

### Sample example 2

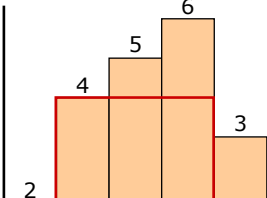

**Input**

heights	2	4	5	6	3
---------	---	---	---	---	---

**Explanation**

**Output**

12
----

**Explanation**

?

Tt

🌙

## Understand the problem

Let's take a moment to make sure you've correctly understood the problem. The quiz below helps you check if you're solving the correct problem:

### Largest Rectangle in Histogram

1

What is the output if the following array of heights is given as input?

heights = [1, 2, 5, 7, 3, 9]

A) 21

B) 27

C) 10

D) 12

## Try it yourself

Implement your solution in the following coding playground:

Java

usercode > LargestRectangle.java

```
1 import java.util.*;
2 public class LargestRectangle{
3     public static int largestRectangle(int[] heights) {
```

```
7         return 0;
8     }
9 }
```

Submit

Test Cases Results

Case 1

Case 2

Case 3

Input #1

[6,2,5,4,5,1,6,4,2]

Largest Rectangle in Histogram
